AAMC/GEA/CGEA Business Meeting Update Special Interest Group (SIG) Convener Activities Report November 9, 2010

Academic Development: Susan Kies Ed.D. & Gina Paul Ph.D.
No update submitted.

Basic Science Education: Alice M. Carrott M.A., B.S.
No update submitted.

Clerkship Administrators: Sue Morschhauser
Ms. Morschhauser submitted a proposal to change the Clerkship Administrators SIG to an Administrators SIG, which would have representation in each of the GEA regions. See the attached proposal titled: *Administrators SIG Group Proposal – 10 25 101.pdf*. Additionally the Administrators SIG discussed the following issues:

1. Group support across the disciplines by mentoring or having specific talks during our sessions career specific.
 2. Getting an up to date listserv for the group to communicate when problems or issues arise.
 3. The group discussed the need for another session besides the current certification that is held for members. Most attendees have already participated in this and want something different for future meetings on Thursday. Most members want to have a certification like the Surgery TAGME certification but for administrators.
-

Continuing Quality Improvement: Aleece Caron Ph.D. & Anna C. Maio M.D.
The Continuing Quality Improvement SIG had a productive year with the following list of our accomplishments.

1. Presented a workshop at the CGEA with an overview of QI and presentations of programs underway that teaches students, residents and faculty QI.
2. We held our SIG meeting at the CGEA and created a plan to move faculty development in QI forward.
3. Drs. Caron and Maio attended the AAMC Quality Meeting in June.
4. We have met with AAMC leadership, Dale Davis and others, both in person and through several phone calls to push faculty development in QI.
5. We have had weekly phone conversations moving our ideas, workshop presentations, and etc. forward.
6. Drs. Kies and Paul along with 2 others are presenting a workshop on QI faculty development at the Generalists in Medical Education Meeting in DC November 5, 2010.
7. The CQI SIG plans to network at the AAMC 2010 meeting to collaborate with others to create our CGEA submission for 2011.
8. Projects of others are mentored throughout the year.

Culture and Health: Timothy P. Hickman M.D., M.Ed., MPH
Submitted a program proposal for a panel discussion in partnership with the Medical Humanities SIG for the CGEA Spring 2011 in Omaha.

Title: Using Medical Humanities to Enhance Learning and Reflection: Through the Lens of Culture.

Panelists: Tim Hickman, MD, University of Missouri, Kansas City
Diane Hummel, MILS, Spectrum Health
Monica Lypson, MD, University of Michigan

Curriculum: Nehad El-Sawi Ph.D.
No update submitted.

Education Leadership: Jeffrey E. Pettit Ph.D.
Dr. Pettit reported that the SIG is working on adapting the Leadership Education and Development (LEAD) program that was created by the SGEA to begin at the 2011 CGEA conference. Currently, they are in the process of identifying facilitators for the 4 major components of the program. They will begin advertising the program later this month to solicit participants for the initial group. The group will not be meeting at AAMC.

Faculty Development: Caren M. Stalburg M.D. & Majka B. Woods Ph.D.
No update submitted.

Libraries in Medical Education: Erika L. Severson M.S.
No update submitted.

Medical Humanities: Diane C. Hummel M.A., MLIS
Submitted a program proposal for a panel discussion in partnership with the Culture and Health SIG for the CGEA Spring 2011 in Omaha.
Title: Using Medical Humanities to Enhance Learning and Reflection: Through the Lens of Culture.
Panelists: Tim Hickman, MD, University of Missouri, Kansas City
Diane Hummel, MILS, Spectrum Health
Monica Lypson, MD, University of Michigan

Population Medicine: Karen Peters Dr.P.H. & Carole W. Keefe Ph.D.
No update submitted.

Service-Learning SIG: Stephen E. Kirchhoff MHA
Service-Learning SIG members are determining the feasibility of conducting a service-learning survey with CGEA members. One approach being considered is to adapt the approach used by Amanda Vogel in her surveys of Health Professions Schools in Service to the Nation in the past decade. We are also planning to submit a collaborative workshop proposal from SLSIG members for the March 2011 CGEA conference in Omaha. Let Stephen Kirchhoff know if you have any questions.

Standardized Patient/Simulation: Dena K. Higbee M.S.
No update submitted.

Technology in Medical Education: Geraud Plantegenest M.A., B.S.
Mr. Plantegenest posted an announcement on the CGEA NING site on November 5, 2010 requesting collaborators to submit a workshop proposal for the CGEA 2011 conference. Some topics of interest include:

- Hands on workshop for using technology tools in medical education. The format for a workshop may be 2 – 3 presenters (from various schools) introducing instructional technologies, tools and providing an opportunity to gain hands on experience in a computer lab. This option is dependent on technical logistics of whether members are willing to bring computers to a workshop session or if a computer lab is available at the Spring 2011 Conference at the University of Nebraska.
- Advantages & disadvantages of creating and developing online OER's (Open Educational Resources).
- Design and development of asynchronous interactive learning modules (e-learning tools, faculty & developers roles, student learning, access).

Interested parties should post their interest and/or other ideas on the NING TIME SIG <<http://cgea-time.ning.com>>. If you are not a member of the NING TIME SIG and are interested in joining please email Larry Hurtubise Larry.Hurtubise@osumc.edu your contact information. He will send you an invitation to join the site.
